

2010 Feed Administrators Seminar

Hickory Knob State Park
McCormick, South Carolina

The AAFCO Feed Administrators Seminar provides feed control officials with the opportunity to gather with other state and federal feed control officials to discuss important issues concerning feed regulations. The relaxed atmosphere of this meeting provides an environment for training and education in multiple areas. Topics can range from feed label and ingredient discussions to informative presentations of changes in federal regulations that will impact a state feed regulatory program. Seminar provides the attendees with time to get to know their feed regulatory counterparts and build relationships that will assist state feed control officials while applying feed laws and regulations to commercial feed.

*This is the most recent agenda for the 2010 Feed Administrators Seminar prior to final approval of all speakers and presenters.
