

Agenda for August 3 Workshop

An all day workshop on the proper preparation of feed, fertilizer and food samples in the laboratory. This workshop is based upon *GOODSamples (Guidance On Obtaining Defensible Samples)* – a document released in October 2015 by FDA, AAFCO (Association of American Feed Control Officials), AFDO (Association of Food and Drug Officials), APHL (American Public Health Laboratories) and Industry.

Lecture topics covered with include

- Sample quality criteria
- Material properties
- Theory of sampling
- Inference
- Splitting techniques
- Quality control and error estimation

Several hands on demonstrations illustrate the concepts covered in the lecture.

Instructor is international sampling expert Charles Ramsey with EnviroStat, Inc.

The registration fee is \$100 for all attendees. Registration includes breaks and lunch.
