 - c.) Removal of VSIP from Official Publication FFIM Recommendation (placeholder) - Austin
6. Assignments/homework for annual meeting
7. Adjourn

Attachment A

Removal of Regulation 4 (d)(3) - Page 137 2022 Official Publication

The Model Regulation states, the following:

(d) Guarantees for drugs shall be stated in terms of percent by weight, except:

(3) Labels for commercial feeds containing growth promotion and/or feed efficiency levels of antibiotics, which are to be fed continuously as the sole ration, are not required to make quantitative guarantees except as specifically noted in the Federal Food Additive Regulations for certain antibiotics, wherein, quantitative guarantees are required regardless of the level or purpose of the antibiotic.

This Model Regulation is not relevant with the introduction of 21 CFR 558.6 and Veterinary Feed Directives no longer allowing growth promotion and/or feed efficiency claims regarding drug sources.

Attachment B

Is this regulation missing a word near the beginning of it? Page 138 of the 2022 OP

8 (c) Non-protein nitrogen ingredients/products defined in the Official Publication of the Association of American Feed Control Officials, when so indicated, are acceptable ingredients in commercial feeds distributed to non-ruminant animals as a source of nutrients other than equivalent crude protein. The

maximum equivalent crude protein from non-protein nitrogen sources when used in non-ruminant rations shall not exceed 1.25% of the total daily ration.
