AAFCO

Association of American Feed Control Officials

2016 OFFICIAL PUBLICATION

Revision 1 4/28/2016

Association of American Feed Control Officials

Discussion

My Notes

Filter by page

Stan Cook

**ATTENTION:**

Please Note, Incorrect Values Appear in the Table AAFCO Dog Food Nutrient Profiles Based on Dry Matter for Maximum Vitamin D, Maximum Vitamin E, Minimum Thiamine, and Minimum Riboflavin Concentrations. The correct values should be:

Maximum Vitamin D IU/kg 3000

Maximum Vitamin E IU/kg Blank – No Value Listed

Minimum Thiamine mg/kg 2.25 for Both Growth and Reproduction and Adult Maintenance Profiles

Minimum Riboflavin mg/kg 5.2 for Both Growth and Reproduction and Adult Maintenance Profiles

The values in the Tables for AAFCO Dog Food Nutrient Profiles Based on Calorie Content and in the explanatory text are correct. The concentrations for Maximum Vitamin D, Maximum Vitamin E, Minimum Thiamine, and Minimum Riboflavin Based on Dry Matter listed above can be calculated by multiply the corresponding value in the AAFCO Dog Food Nutrient Profiles Based on Calorie Content by 4.

This was a misprint – the correct version of the table/profiles can be found in the 2015 Denver minutes that were voted through the PFC here:

[http://www.aafo.org/Portals/0/SiteContent/Regl\\_Food/Reports/Pet\\_Food\\_Report\\_2015\\_Annual.pdf](http://www.aafo.org/Portals/0/SiteContent/Regl_Food/Reports/Pet_Food_Report_2015_Annual.pdf)

We will be correcting the online Official Publication as soon as possible.

Lab Methods Members and Advisors,

Please note announcement below. I have searched for and added in as many of you as I could find already registered with the FEED BIN and to the Lab Methods Team. We'll try to get everyone added in over the next month.
